TYGAR MANUFACTURING, LLC™ Expands in Canada with Demonstrations & Training Classes

TYGAR Manufacturing™, LLC, the leading manufacturer of decorative curbing equipment for the landscape curbing industry, announces further expansion in Canada with new demonstrations, seminars, and training classes in several provinces. The demand for curbing among homeowners and businesses has expanded rapidly in recent years, leading to wide-open opportunity for contractors and entrepreneurs. During January, TYGAR's Ontario office attended the National Franchise & Business Opportunity Show in Toronto and conducted a full day curbing demonstration and seminar in Ancaster. In February and March, TYGAR's other offices will provide similar demonstrations and trainings in Winnipeg, MB, Edmonton and Medicine Hat, AB, Montreal, QC, and Vancouver, BC. In addition, to supplement live training sessions, TYGAR will provide online and DVD modules to prospective curbing contractors. The company is widely recognized the leader in training in support in the curbing industry, with a vast experience in the installation of curbing in cold, harsh climates.

With a decade-long presence in such climates as Northern Alberta and the Rocky Mountain States, TYGAR has invested years into developing the industry's only Weather-Buster system proven to strengthen curbing in the coldest and harshest of climates. Clif Dodge, sales manager of TYGAR states "by developing proprietary additives, designing the CurbCable system for running a galvanized cable through curbing, and training our curbing contractors to mix formulas stronger than industry standards, we have eliminated the adverse impact of freezing and thawing." In addition, "With TYGAR's system, we have been able to ensure our clients that our curbing lasts without cracking and that it is a long-term home investment," said Craig Cochran of GreenThumb Curbing in Medicine Hat, Alberta, where winter temperatures reach well below zero. We've been able to successfully run all types of curbing for years without any major issues."

At all of the events, TYGAR will exhibit the newly introduced **BENGAL TG1000XL**, the newest and most innovative curb machine ever. With a significantly enhanced system for adding strength and longevity to curbing, the BENGAL XL offers more choices in curb shapes and attachments, and greater stamping variety, thus resulting in a greater value to our contractors.

TYGAR provides complete turnkey landscape curbing equipment solutions for contractors and entrepreneurs who wish to enter the highly profitable business of decorative curbing. All of our equipment packages include the BENGAL TG1000 XL Curb Machine, the SC2000 Sabertooth Sod Cutter, a custom curbing trailer with attached concrete mixer, complete training & support, and all the necessary accessories to get started. Call us at 1-888-EZ-TYGAR or visit tygarmfg.com to request a complete information package and DVD on the curbing business.
